Introduction

1.1. Socio-Economic and Political condition in Tanzania

Tanzania, being one of the large countries in this area as compared to all other Eastern African countries has an estimated population of 40 million of which over 60% of her people is below 40years. The lives of all Tanzanians depend on natural resources for both the present and future generations. The country is endowed with significant natural resources, which include forests and woodlands, wild animals, rivers, lakes and wetlands. All these resources play big roles to the economy in terms of the social and economic goods and services, which they provide. Poverty is still a challenge in the country after 48 years of independence. HIV-AIDS is eating up the young generation which will eventually become the national leaders of this country. We have other social challenges like crime, drugs, immorality, corruption and many others on our beautiful nation. Tanzania economic is growing at 7.1% per year which is a very good sign of where we are going. Tanzania is full of known and unknown paradoxes. For example, Tanzania is the sole producer of Tanzanite, very expensive jewelry. Tanzania is one of the unique destinations on the African continent that is untapped. It is a land of many wonders hubbing an un-paralleled diversity of fauna and flora. Kilimanjaro, the highest permanently snow-capped free standing mountain in Africa, the exotic Islands of Zanzibar, the finest game sanctuaries of Serengeti, Tarangire, Lake Manyara, Ngorongoro Crater, Ruaha, Selous and the Marine Park of Mafia Island are only but a few of the living examples. The scenery, topography and very friendly people harbor the growth of excellent cultural tourism beach holidays, game hunting, historical and archaeological ventures – and certainly the best wildlife photographic safaris on the continent, but these resources do not help ease the economic stress of her people.

1.2. Spiritual Condition of Tanzania

Like many other African nations, the church in Tanzania experiences the natural way of presenting the gospel using the traditional open air meeting as the main way of evangelizing. It is proved without doubt that this method is very expensive and yields very low fruit, but despite of its undeniable truth that the method has brought many to the living faith of Christ for many years, it is still preferred by most churches. When you visit university campus fellowships, you will find out that most students are very zealous to worshipping God through the natural methods; singing and dancing, and then the anointed speaker stands to share the gospel while others are listening keenly to hear what God may be speaking through the preacher. The traditional methods come with a lot of excitements and vigor and seem to be popular to most groups. We however, face a few challenges on our campuses just like what is happening in the churches; lack of in-depth bible studies, lack of practical training on witnessing, lack of follow up and discipleship, etc. because this method renders no training, no direct responsibility is given to individuals, most students prefer it to group bible studies that engage them into challenges that will eventually make them grow when taken positively.

1.3. Challenges and Opportunities

With variety of opportunities present in most campuses, there also accompanying challenges in each of the prevailing strategies of evangelism. The environment of most campuses allow for spiritual movements to be built because of the existing national freedom of worship and religion. Tanzanians are very friendly and welcoming which makes it possible to share and disciple students. Many may abuse this rare opportunity, but it is a chance for us to capitalize on the situation and make known the mystery of Christ on our campuses. Major challenge that we face is lack of Christian movements in all of these campuses.

1.4. Needs for the church in Tanzania

- ✓ Good leadership (integrity, love, Christ centeredness, servant attitude, long term thinking, confidence)
- ✓ Quality –evangelism, discipleship and leadership development
- ✓ Kingdom mentality or eternal perspective (unity, partnership, willingness and awareness to share available resources)
- ✓ Local resource development (vision, strategic plans, prayer, manpower, material, money)
- ✓ Contribution to socio-economic improvement

- ✓ Transformation of lives, ministry growth and expansion, trained manpower, and momentum to accelerate the fulfillment of the Great Commission.
- ✓ Revival in the church (unity, holiness, faith and vision)
- ✓ Workers in the harvest field

1.5. Needs of LIFE Ministry (T)

- ✓ Workers
- ✓ Movement building and ministry expansion
- ✓ Local resource development
- ✓ Leadership development
- ✓ Evangelism and discipleship
- ✓ Ministry promotion and publicity
- ✓ Local partnership
- ✓ Boldness, courage and faith
- ✓ Creativity and innovativeness

1.6. Current Universities and Colleges Condition in Tanzania

Tanzania has a rapid increase of university and college institution because of economical growth of the nation and the challenges in market. The government is building the largest University in the whole area with the capacity of accommodating 45,000 students at one time in Dodoma, our capital city of which by the end of 2009, the University of Dodoma will be accommodating over 15000 students from all over the country.

We have over 33 universities and over other 50 higher learning colleges in Tanzania that carry over 60,000 students from all over the country. One of the goals of Change your Destiny 2010 is to equip university students for ministry and inspire them to the unfinished task of building campus movements everywhere.

Change Your Destiny 2010 will challenge students to be Christ minded, mission oriented and life -long dedicated children of God. We invite every Christian to become an intercessor for Change Your Destiny 2010 and partner with us to make this dream true.

There are Christian movements on only few of these campuses. This means that most universities are not being influenced by the gospel of Jesus Christ. Students are graduating and becoming doctors, lawyers, professors, and statesmen without

ever being changed by the gospel. Change Your Destiny 2010 is to help change all that through continuous training.

Change Your Destiny 2010 is LIFE Ministry Tanzania first national wide student mission conference which seeks to begin movements that will change the situation of our nation.

1.10. Theme selection: “Change Your Destiny”

There were many themes presented but the one that found favor to all the delegates was “*Change Your Destiny*”. This came in after the reading of the scriptures from Deuteronomy 2:3. “You have been wandering around in this hill country long enough; turn to the north” (NLT). We also read scriptures from Isaiah 60, 61, Acts 10:38; and Matthew 19:26. Other scriptures we digested before coming up with the theme were Exodus 33:12-23 and Ephesians 1:17-23 as we sought the Lord in relation to the evaluation of our present ministry. These words challenged us into action and all agreed that it is high time for us to take measures and trust the Lord for the impossible.
